About Us

For over 25 years, Mannum Medical has proudly welcomed registrars, interns, and medical students as part of our commitment to medical education and rural health. As passionate and experienced supervisors, we take great pride in sharing our clinical knowledge while also teaching the art of medicine — including communication, empathy, and whole-person care.

We believe that mentoring the next generation of doctors is a privilege and an essential part of sustaining high-quality healthcare in rural communities. Our hope is that through meaningful guidance and hands-on experience, we inspire future practitioners to pursue rewarding careers as rural GPs.
